Hazing Prevention Training for Students

Collin's Law requires education for all students before they join an organization. This is an important step in preventing hazing as we continue to promote a culture of care.

There will be multiple hazing prevention trainings open to all students to fulfill this requirement before joining a student group. This training will cover definitions of hazing, awareness, prevention, intervention, and reporting.

This training is open to all students and is strongly recommended even if they are already part of a group.

General Student Trainings
